

Virtual/Fractional CISO Services

Last Modified on 03/23/2021 7:37 pm EDT

Provider: [Edge](#)

A virtual/fractional CISO can be staffed by Edge to identify and implement viable information security strategies and policies to improve security effectiveness and adhere to regulatory and compliance requirements. Services can be consumed virtually or on-site, and on a project-based, interim, or full time basis.

Typical Use Cases

- An institution realizes that it is essential to formalize and implement a cybersecurity program, but has challenges staffing the leadership position (whether those challenges be budgetary or identifying and attracting talent).
- An institution would like to have an outside executive-level information security resource engage and evaluate current IT processes, programs, and infrastructure for security integrity.
